# Coated Aluminum Orthopedic Hand & Hand Fixation Device

Oxidation of lead surfaces is a normal process. Steam autoclave for 20 minutes - temperatures should not exceed 248°F (120°C). Sterilize with Dry Heat for 30 minutes at 356°F (180°C). Avoid using chemical sterilization as it can cause severe corrosion.

Lead hands are only good for several uses. They should be replaced. Limited warranty (not stainless steel).

ADULT LEAD HAND  
0-49090  
14" (356 mm)

CHILD LEAD HAND  
0-49092  
9.5" (241 mm)

Thinner and more  
flexible model.  
Longer fingers wrap on  
ends, eliminating side  
tabs.

ADULT LEAD HAND  
0-49093  
9.5" (241 mm)  
2 mm thick

# Coated Aluminum Orthopedic Hand & Hand Fixation Device

## Coated Aluminum Orthopedic Hand

Product #	Description	Length	Width
5-PM962	Coated Aluminum Orthopedic Hand, Reusable, Large	9.5" (241 mm)	8.5" (216 mm)
5-PM963	Coated Aluminum Orthopedic Hand, Reusable, X-Large	13" (330 mm)	10.5" (267 mm)
5-PM710	Lead Orthopedic Hand	10.75" (273 mm)	9.5" (241 mm)

Coated aluminum Orthopedic Hands are ideal for reconstructive hand surgery and provide an environmentally safe alternative to traditional lead hands and splints.

Orthopedic Hands are made of pliable aluminum with a non-latex coating and are reusable and easy to sterilize. Aluminum Hands may be used during x-ray and fluoroscopy procedures.
