UNMATCHED SERVICE · UNLIMITED INSTRUMENTS

822 Montgomery Ave #205  
Narberth, PA 19072  
(800) 600-0428

Designed to remove solid and cannulated screws during trauma, hip, knee and arthroscopy procedures.

Used for removal of:

- Stripped hex screws
- Buried screws
- Partial screws with broken screw heads

**Product Number  
101-S001000**

The drive end (A/O) is designed for easy and quick engagement with the universal instrument handle.

## Universal Extractor

Designed to remove screws with heads partially or completely missing. The cone shaped head fully engages the remaining screw and optimizes the force needed for removal. The bolt is disposable and locks into place using a unique thread design.

***Designed to be used in a counter-clockwise direction.***

## Trephines

Designed to fit over submerged screws for extraction with minimal bone loss. Extraction is enhanced by the unique tooth design.

***Designed to be used in a counter-clockwise direction.***

## Screw Extractor

Unique thread design accommodates removal of stripped screws. The instrument “locks” into the screw head and allows removal once engaged.

***Designed to be used in a counter-clockwise direction.***
